SOLAR iBOOST+

Pairing the Buddy to the Solar iBoost+

This document provides guidance on pairing the Buddy to the Solar iBoost+
NB. The iBoost+ Buddy is not compatible with original Solar iBoost

Tip: plug in and setup the Buddy in close proximity to the Solar iBoost for convenience. When paired simply unplug and relocate it as desired.

Please follow these instructions carefully and ensure that the unit is switched on prior to carrying out this procedure.

Fig 1

1. Press and hold both B and Boost buttons simultaneously on the Buddy for 5 seconds then release. (Fig 1)

2. After 5 seconds the display will show 'Install Mode 58s Unbound'. (Fig 2)

3. During the 60 second countdown move to the Solar iBoost+.

4. Press any button to switch the back light on.

Fig 2

5. Immediately press and hold the B on the Solar iBoost+ for 5 seconds then release. (Fig 3)

6. The Solar iBoost+ display will show 'Pairing with Device…'. (Fig 4)

7. When the pairing is successful the Solar iBoost+ will show 'Pairing Successful'. (Fig 5)

Fig 3

8. The Buddy will display 'Install Mode 05s Bound' The Buddy is fully paired after 5 seconds.

9. If the pairing fails the Buddy display will time out and again show 'Not Bound'.

10. Finally, locate the Buddy in a convenient position.
